

# Study American Religion in Summer II

John James Barralet, "The Apotheosis of Washington (1802-1816)

*The United States is, by most measures, the most religious country in the developed world, but the place of religion in our democratic society has always been unsettled. Is America a Christian nation? Does religion allow us to transcend race, or etch it more deeply onto our lives? Why does religion enter so often into discussions of gender, the family, and reproduction?*

This summer, get beyond the soundbites to explore these and other questions in American religious history. Earn credit while learning to think about religion's role in American politics, society, and culture. **Fulfills Historical Analysis (HS), North Atlantic World (NA), and US Diversity (US).**
