**Mondays**  
3:35PM-6:25PM

**General Education  
Requirements:**  
PH, GL

This course examines the challenges posed to ethics and theology by the Holocaust. We will consider the collapse of traditional ethical approaches from a global and comparative context following the extermination of Jews in Europe during World War II. Philosophical and theological issues to be addressed include the problem of evil, divine omnipotence, theodicy, human animality, representation, and an ethics of memory.
